

Tech Note

Did you know that when you are talking about a particular fitting's HOSE SIZE that the hose size is based on a sixteenth of an inch.

Let me explain:

If you have a #4 fitting, that fitting in terms of measurements is 4/16" or 1/4". See the chart to better understand this tip.

Fitting	Tube Size
#3	3/16"
#4	4/16" or 1/4"
#6	6/16" or 3/8"
#8	8/16" or 1/2"
#10	10/16" or 5/8"
#12	12/16" or 3/4"
#16	16/16" or 1"
